Johannesburg, South Africa, 2198 | [Kelly's portfolio](#)

081 447 5851 / 081 716 5893 | kellynkohla0@gmail.com | [GitHub](#)

Junior Web Developer with hands-on experience building responsive, real-world web applications using React Js, JavaScript, Node Js, and SQL. Strong focus on clean UI, functionality, and problem-solving through practical projects.

PROJECTS/EXPERIENCE

FRONTEND DEVELOPMENT

RockChem

Client Facing Corporate Website

Tech: React Js, JavaScript, Html, CSS

Live: www.rockchemsolutions.co.za

- Developed a responsive corporate website to showcase company services and projects
- Built reusable UI components using React for maintainable code structure
- Implemented a callback request feature to improve customer engagement
- Ensured cross-browser compatibility and mobile responsiveness
- Optimized layout and navigation for improved user experience

FRONTEND DEVELOPMENT

Chef Thato - Personal Portfolio Website

Tech: React Js, JavaScript, Html, CSS

Live: <https://chef-thato-website.vercel.app/>

- Designed and developed a responsive personal portfolio website for a professional chef
- Built reusable components to display services, portfolio items, and contact information
- Applied modern CSS styling and layout techniques to ensure consistent design across devices
- Focused on clean UI, accessibility, and user-friendly navigation
- Delivered a polished, production-ready website for client use

Full-Stack Web Application

Ref Allocator – Smart Referee Allocation Web Application

Tech: React Js, JavaScript, Node.js(Express Js), MySQL, Paystack

Live: <https://ref-placer.onrender.com/>

- Developed a full stack web application to automate referee assignment and scheduling for sports tournaments
 - Built responsive user interfaces using HTML, CSS and JavaScript for smooth cross-device usage
 - Implemented secure authentication and role-based access for administrators and referees
 - Designed scheduling logic to prevent referee double-bookings across multiple matches
 - Integrated Paystack payment gateway to enable subscription-based premium features
 - Connected frontend to a MySQL database for reliable data storage and retrieval
 - Deployed a production-ready system that reduced manual scheduling and improved operational efficiency
-
